

## Master in Product & Interior Design

**Available in:** Milan, Italy

**Intake:** November

**Website:** [www.Raffles-IAO.com](http://www.Raffles-IAO.com)

## 10-month Master in Product & Interior Design

The course will provide an understanding of the following topics:

- Know-how in materials and production projects
- Development of new public and private spaces
- New products and distribution patterns
- Human and environmental sustainability
- Management of the project in all its phases, from conception of idea to business feasibility
- Material recycling and environmental economics of products
- Exploring new product boundaries
- 3D printing and other new production technologies
- Lighting, sound, furniture, interior landscaping

In addition to these subjects, students will have the opportunity to visit design studios and production houses in the design industry, participate in industry-related trade fairs, such as Milano Design Week, and fully immerse themselves in Milanese design system.

Note: Curricula are subject to change.
